\*Statistically different from zero at the 90-percent confidence level.

<sup>1</sup>The 2003 and 2004 CPS offered respondents the option of choosing more than one race. The 2002 CPS recorded only one race for each respondent. The 3-year averages are based on combining the 2003 and 2004 CPS race categories shown in the stub with the relevant single race categories of White, Black, American Indian and Alaska Native, or Asian and Pacific Islander recorded in the 2002 CPS.

<sup>2</sup>The 2-year average for 2001-2002 is based on combining the 2003 CPS race categories shown in the stub with the relevant single race categories of White, Black, American Indian and Alaska Native, or Asian and Pacific Islander recorded in the 2002 CPS.

<sup>3</sup>Details may not sum to totals because of rounding.

<sup>4</sup>A 90-percent confidence interval is a measure of an estimate's variability. The larger the confidence interval in relation to the size of the estimate, the less reliable the estimate. For more information see "Standard errors and their use" at <[www.census.gov/hhes/www/p60-226sa.pdf](http://www.census.gov/hhes/www/p60-226sa.pdf)>.

<sup>5</sup>White alone refers to people who reported White and did not report any other race category. The use of this single-race population does not imply that it is the preferred method of presenting or analyzing data. The Census Bureau uses a variety of approaches. Information on people who reported more than one race, such as White and American Indian and Alaska Native or Asian and Black or African American, is available from Census 2000 through American FactFinder. About 2.6 percent of people reported more than one race in Census 2000.

<sup>6</sup>Black alone refers to people who reported Black and did not report any other race category.

<sup>7</sup>American Indian and Alaska Native alone refers to people who reported American Indian and Alaska Native and did not report any other race category.

<sup>8</sup>Asian alone refers to people who reported Asian and did not report any other race category.

<sup>9</sup>Asian and/or Native Hawaiian and Other Pacific Islander refers to people who reported either or both of these categories, but did not report any other category.
